SHORT DESCRIPTION/ PRODUCT INFO: (40 characters)

ERA Reverb Remover is a multi-patented, single knob audio effect plugin that offer precision-grade dereverberation.

It's a **knob**ainer. High-Quality Reverb Removal in seconds.

LONG DESCRIPTION/ PRODUCT INFO: (500 – 800 characters) 3rd party please

Based on the accusonus multi-patented audio restoration technology, **ERA Reverb Remover** automatically estimates the reverberation profile and offers the means to adjust the reverberation amount with a single control. It's the first ever single-knob plugin to quickly reduce excessive reverb and bring your sound into focus. Add clarity, clean up your dialogue or tighten up your musical performance simply by turning a knob.

For more control over reverb suppression, we've added 5 buttons that allow you to focus processing on a specific part of the frequency spectrum: (i) all-frequencies, (ii) high-frequencies, (iii) low-frequencies, (iv) high & low frequencies and (v) mid frequencies. With a new elegant UI and an automatic gain compensation, the new ERA Reverb Remover makes a previously impossible task as simple as it gets.

FEATURES: Bullet points only/ 3rd party please

- Single knob operation
- Simple and streamlined user interface
