SHORT DESCRIPTION/ PRODUCT INFO: (40 characters)

Regroover Pro is an Artificial-Intelligence beat machine that extends traditional music sampling.

LONG DESCRIPTION/ PRODUCT INFO: (500 – 800 characters) 3rd party please

Regroover Pro is a virtual instrument plugin whose A.I. engine analyzes an audio clip and separates it into the fundamental audio elements in separate tracks called *Layers*. Regroover allows you to reach deep within your audio clips and extract previously unreachable sound elements. For example, if your clip is a drum loop, Regroover will extract layers containing the kick, the snare and the cymbals or any combination of those that is meaningful to the A.I. engine. If you use Regroover with an ambient soundscape loop, the resulting layers will be more abstract (and perhaps more interesting!). After Regroover has extracted the layers from your audio clip, it's time for you to start using them to create fresh and exciting music! You can extract layers from different clips and use the isolated parts to create your own signature sounds and kits.

FEATURES: Bullet points only/ 3rd party please

- Split (unmix) audio loops into distinct layers
- Refine split results with custom annotations
- Instant Layer remixing using snap-to-grid and loop markers
- Trigger your layers via MIDI and re-arrange your loops
- Adjust volume, pan, EQ, Gate, Compressor, Stereo Enhancer to any layer
- Load and play expansion kits
- Extract any sample or loop via simple drag and drop
- Extract your beat variations (patterns) as audio files
- Use multiple pattern lengths to create new straight beats or polyrhythms
- Unique Transient Shaper optimized for beat processing
- Analog-inspired saturator for all layers Apply external effects with multi-channel output
- Extract sounds from Layers and drag them to their own trigger pads
- Edit extracted sounds via the expansion kit mixer and effects
- Load external sounds to enrich your expansion kit
- Save expansion kits and create self-contained Regroover project

SYSTEM REQUIREMENTS /TECH SPECS: Bullet points only/3rd party please

Your computer must have:

- an Intel (or Intel compatible) CPU
- a minimum of 2GB RAM memory
- at least 250MB free space on your hard disk
- a minimum a screen resolution of 1280x800 pixels

Supported formats

Regroover is available as a **virtual instrument** plug-in in the following formats:

- AU (32/64-bit), VST (32/64-bit), AAX (64-bit) for Mac OS X 10.9 or higher
- VST (32/64-bit) and AAX (64-bit) for Windows 7 (with Service Pack 1) or higher
